

Letter from the Chair:

On behalf of the five host SPE Sections, Pittsburgh, Appalachia, Northern West Virginia, East Kentucky and Ohio Petroleum, we extend a warm invitation to join us at the 2024 Society of Petroleum Engineers Eastern Regional Meeting. The event will be hosted at the picturesque Oglebay Resort in Wheeling, WV, from October 8th to 10th.

This year's program promises an enriching experience, featuring a reception, two days of technical sessions, a keynote luncheon, exhibits, a short course, round tables, and a golf outing.

The Technical Program Committee encourages your active participation in shaping the program by submitting paper proposals for publication and subsequent presentation. We are particularly interested in case studies covering the following topics:

- Drilling and Completions
- Production Engineering and Operations
- Reservoir Engineering and Simulations
- Management & Information
- Health, Safety, and Environment

Submit your proposals online by March 26, 2024, and anticipate notification of acceptance in early April. For more details or to submit a proposal, please visit our website at www.speeasternregional.org.

Nestled on 2,000 acres, Oglebay is more than a conference venue; it's a public park featuring dining, cabins, lodging, the Good Zoo, West Spa, museums, gardens, and championship golf. Conveniently located 40 miles southwest of Pittsburgh, it stands as the only self-supporting public municipal park in operation in the United States. Our conference is excited to return for our third year at this beautiful location.

The proceeds from this event will contribute to scholarship opportunities for Petroleum and Natural Gas Engineering students in the region, fostering future leaders and ensuring success within our industry for years to come. We eagerly anticipate your presence at Oglebay in October, where knowledge, networking, and natural beauty converge.

Kimberly Ayers
Conference Committee Chair
